## INTRODUCTION

Our laboratory services are offered to the occupational health network and to private enterprises.

Our services include environmental, toxicological and microbiological analyses, sampling equipment, instrument rental and calibration, and tests on Respiratory Protective Devices and Protective Footwear.

For environmental and microbiological analyses, we recommend that you consult the Sampling Guide for Air Contaminants in the Workplace on the IRSST's Web site. [www.irsst.qc.ca](http://www.irsst.qc.ca)

For toxicological analyses, we recommend that you consult the *Guide de surveillance biologique – Stratégie de prélèvement et interprétation des résultats* and Le guide de prélèvement des échantillons biologiques also available on the IRSST's Web site : <https://www.irsst.qc.ca/en/publications-tools/publication/i/336/n/surveillance-biologique> .

## POLICY ON THE USE OF THE LABORATORY SERVICES OFFERED BY THE IRSST

### Cost

The cost of the sampling equipment is included in the costs of analysis.

The costs of the analytical services and instrument-related services are in effect as of January 1<sup>st</sup>, 2023.

The cost for a field blank analysis is the same as a sample.

### Terms of payment

The client agrees to pay the IRSST for the costs of service within 30 days of receipt of the invoice.

Using the following methods:

- Cheque payable to the IRSST
- Bank transfer: Banking information is on the invoice
- For payments by bank transfer, please email the payment slip to [compte.recevable@irsst.qc.ca](mailto:compte.recevable@irsst.qc.ca)

### Sampling equipment

Except for toxicological analyses, the client agrees to use only the sampling equipment supplied by the IRSST, according to the *Sampling Guide for Air Contaminants in the Workplace*.

For toxicological analyses, the client agrees to obtain the sampling equipment himself, according to the *Guide de prélèvement des échantillons biologiques*.

If the equipment ordered is not all used, the unused quantity must be returned to us within 60 days; otherwise, it will be billed at market costs.

## Samples reception

Business hours: Monday to Friday 8AM to 12PM & 1PM to 4PM

Samples received at the laboratory before 4 PM will be considered received the same day for analysis delay determination.

Samples received after 4 PM at the laboratory will be considered received the next business day.

## Calibration certificates

The calibration certificates issued by the IRSST are subject to a copyright in accordance with accreditation requirements.

However, the client is authorized to reproduce all calibration certificates in whole (as stipulated on the certificates) for its own instruments in order to demonstrate, if need be, that they were calibrated according to IRSST's standards.

## Purchase order

- ✓ The client has to enter its Purchase Order number on the request form if he wishes it to appear on the invoice.

## Subcontracted work

- ✓ In some situations or for certain analyses, the IRSST laboratory subcontracts to other laboratories thoroughly selected according to our accreditation requirements. If applicable, the client authorization is required beforehand. A comment will then appear on the IRSST report, and the subcontractor laboratory's report will be provided. Additional costs of 25% will be billed as well as the costs for the sampling equipment, if applicable.

## Rush turnaround

- ✓ Additional costs of 25% will be applicable if any analysis needs to be prioritized compared to regular delay. Such demands need prior approval by the Laboratory that are to be addressed through Customer Service.
- ✓ Additional costs of 25% will be applicable for any urgent request for equipment rental, meaning within a maximum of 5 business days following reception of the instrument rental request.
- ✓ Additional costs of 25% will be applicable for any urgent request for instrument calibration, meaning within a maximum of 5 business days following reception of the request.

## How to access our Services

Services are available through our *ClicLab* web service: <https://cliclab.irsst.qc.ca/Login>

For customers who have not yet registered to *ClicLab*, please contact Laboratory Customer Service by email at [sac.labo@irsst.qc.ca](mailto:sac.labo@irsst.qc.ca) or at 514-288-1551, extension 306.

New customers will first need to fill our registration forms available on the Laboratory Services page of the IRSST web site: <https://www.irsst.qc.ca/en/laboratories/register> .

## Accreditation

With recognized expertise in occupational health and safety services, the IRSST has several accreditations that guarantee to its partners and clients the quality, integrity and recognition of its work.

### Areas of accreditation and organizations

The Analytical and Calibration Laboratories are accredited by these organizations according to ISO/IEC 17025:2017 standard.

#### **American Industrial Hygiene Association - Laboratory Accreditation Program (AIHA LAP)**

- Asbestos
- Metals (including beryllium)
- Silica
- Solvents
- Ions
- Respirable compressed air (CRA)

Scope of accreditation of analytical laboratories:

<https://www.aihaaccreditedlabs.org/lab-accreditation-programs/find-an-accredited-lab> - Lab ID : LAP-101913

#### **Calibration Laboratory Assessment Service (CLAS) from National Council Research of Canada (NRC)**

- Acoustic
- Flow

Scope of accreditation of calibration laboratories:

- CLAS: <https://nrc.canada.ca/en/certifications-evaluations-standards/calibration-laboratory-assessment-service/directory-accredited-calibration-laboratories/clas-certificate-number-94-01>
- SCC (Standard Council of Canada):

**New York State Department of Health, Wadsworth Center-Environmental Laboratory Approval Program (NYSDOH-ELAP)**

- Asbestos in Non-Friable Material by Transmission Electron Microscopy (TEM).

Certificate and scope of accreditation: <https://www.irsst.qc.ca/Portals/0/upload/3-laboratoires/Certificat-ELAP.pdf>

**Standard Council of Canada (SCC)**

- Filtration efficiency and differential pressure of a filtering face-piece (FFPs) according to procedure IRSST I-APR-001 and the method from Annex A of the attestation document BNQ 1922-900.

Certificate and scope of accreditation:

## Instrument rental policy

- 1) The client agrees to use the instrument according to the specifications described in the instrument's user manual or in any IRSST document accompanying the instrument. The instrument and its briefcase must be returned to IRSST, decontaminated and in good condition.
- 2) The costs of repair, cleaning or replacement made necessary following the use of the instrument are assumed in whole by the client. This includes damage caused during transportation, if applicable.
- 3) The rental costs are calculated by day, week or month (20 business days) and include initial calibration by the IRSST's laboratories. For direct reading instruments, only a functional check is carried out when the calibration is less than one year old.
- 4) The rented instrument is made available to the client around 4 p.m. on the day before the first day of rental (business day).
- 5) The rented instrument must be returned to the IRSST's laboratories before 12 noon on the day following the final day of rental (business day).
- 6) Any cancellation will result in a penalty equivalent to a one-day rental fee per instrument that will be billed to the client, unless a two days' notice is given prior to the rental period.
- 7) For any instrument and sampling equipment shipments done by the IRSST, the IRSST assumes the transportation and insurance costs.
- 8) For any instrument and sampling equipment shipments done by the client, the latter assumes the transportation and insurance costs.
- 9) All rentals or rental extensions must be arranged with Laboratory Customer Service (514) 288-1551, ext. 306, or by e-mail: [sac.labo@irsst.qc.ca](mailto:sac.labo@irsst.qc.ca).

**Reminder:** Additional costs of 25% will be applicable for any urgent request for equipment rental, meaning within a maximum of five (5) business days following reception of the instrument rental request by Customer Service.

## Efficacy evaluation Tests on Masks

### Type of mask : N95-Type Respiratory Protective Device (APR)

#### Evaluation of the filtration efficacy of an N95-type respiratory protective device (RPD)

Respiratory Filtration efficiency and differential pressure evaluation by comparison to an N95 NIOSH certified respirator under title 42 CFR 84.

*A minimum of 10 RPD per lot is required, per each testing request (one lot = one request).*

**\$1100  
per request**

### Type of mask : Filtering Face Protection (FFP)

#### FFP performance evaluation for BNQ\* certification

Filtering Face Protection (FFP) filtration efficiency determination for 20 nm to 4000 nm particules following Appendix A of BNQ 1922-900/2020 attestation document.

*A minimum of 10 masks per lot is required, per each testing request (one lot = one request).*

**225 \$  
per mask**

<b>Compressed Breathing air</b>
<b>\$425</b>
The portable device for sampling and analyzing compressed breathing air was designed by IRSST in reference to the standard CAN/CSA-Z180.1-00. This device allows the determination of the quality of the breathing air and compressed breathing air generated by systems such as supplied-air respirators, supplied-air suits, self-contained breathing apparatus (SCBA) (open-circuit) and other systems, as long as they generate a pressure equal or above 10 lbs/in <sup>2</sup> (10 psi).

## INSTRUMENT CALIBRATION COSTS

For Acoustics, Electromagnetism and Flow meters, if a deviation from the manufacturer’s method is required, authorization from the client is required before proceeding to the calibration of the instrument.

### Acoustics (1/4)

<b>Sound calibrator</b>		
<i>Calibration of sound level, frequency and percentage of total distortion of the acoustic signal generated in conformance to standard IEC 60942: 2003 “Electroacoustics – Sound calibrators”.</i>		
Calibration according to IEC 60942: 2003 “ <i>Electroacoustics – Sound calibrators – Annex B – Periodic tests</i> ”.	114dB at 250hz	<b>\$161</b>
	94 dB at 1000hz	<b>\$161</b>
	114 dB at 1000hz	<b>\$161</b>
Calibration according to IEC 60942: 2003 “ <i>Electroacoustics – Sound calibrators – Annex B – Periodic tests</i> ”. (only on specific models)	94 dB and 114 dB at 1000 Hz	<b>\$322</b>
<p>To be calibrated, the sound calibrator must allow the calibration of 1 inch or ½ inch diameter microphones.</p> <p>For sound calibrators consisting of more than one level, each one constitutes a calibration. If the level is not specified, two levels will be calibrated.</p>		
<b>Main models :</b>	<ul style="list-style-type: none"> <li>- Brüel &amp; Kjær : 4230 and 4231</li> <li>- Larson Davis : CAL150, CAL200 and CAL250</li> <li>- Quest : QC-10</li> </ul> <p><b>For a sound calibrator model that is not included in this list, please contact Customer Service <a href="mailto:sac.labo@irsst.qc.ca">sac.labo@irsst.qc.ca</a> to obtain confirmation regarding its possible calibration by the Acoustical Laboratory.</b></p>	

## Acoustics (2/4)

## Acoustics (3/4)

### Sound level meter, integrating-averaging sound level meter, sound level meter - frequency analyzer

*Acoustical and electrical calibration of the instrument in conformance to standard IEC 61672-1: 2002, "Electroacoustics – Sound level meters – Part 1: Specifications"*

*Acoustical and electrical calibration of the instrument according to standard CEI 61672-3 : 2006, « Électroacoustique – Sonomètres – Part 3 : Periodic Tests »*

**One (1) measuring range:** available only for noise measuring instruments reported by the manufacturer as complying with standard IEC 61672-1: 2002, "Electroacoustics - Sound level meters – Part 1: Specifications."

- Includes acoustical calibration as well as all the electrical tests periodically recommended by IEC 61672-3: 2006 for a noise measuring instrument.
- Required in legal metrology, because the Calibration Laboratory can, following this calibration, issue a declaration on the compliance of the noise measuring instrument with the complete requirements of IEC 61672-1: 2002.
- The electrical tests stipulated by IEC 61672-3: 2006 allow minimum verifications of the following characteristics of a noise measuring instrument: time and frequency weightings, linear operating range, self-generated electrical and acoustical noise, precision of the peak detector, precision of the exposure level calculations, response of the noise measuring instrument to signals of different polarities, initiation level for the overload detection circuit.

### 4-Gas detector (explosivity, oxygen, CO, H<sub>2</sub>S)

**Models: X-am 2000, X-am 2500, X-am 5000 and X-am 8000 from Dräger**

Calibration of 4-Gas detector – 2 points calibration of the oxygen sensor, 3 points for the other sensors

**\$215**

## Chemical measurements – Direct Reading Instruments (cont.)

### Photoionizer

**Models MultiRAE Plus, MiniRAE 3000 and ToxiRAE PROPID**

Calibration of photionizer – 2 points calibration with reference to isobutylene

**\$215**

### Indoor air quality analyzer

**Models: Fluke 975**

Calibration of CO and CO<sub>2</sub> sensors – 3 points calibration

**\$215**

Calibration of temperature sensors – 9 points calibration

**\$161**

Calibration of relative humidity sensors - 9 points calibration

**\$161**

### Ozone analyzer

**Models POM and GazAlert extreme**

Calibration with an ozone generator – 3 points calibration

**\$430**

## Thermohygrometry

### WBGT heat stress monitor with datalogger module

WBGT 9-point Temperature calibration of WBGT

**\$270**

### WBGT heat stress monitor without datalogger module

WBGT 3-point Temperature calibration

**\$430**

**Model :**  
 - RSS-214  
 - QuesTemp 30  
 - QuesTemp 32

### Thermohygrometry (cont.)

**Dry bulb temperature and relative humidity digital measuring instrument without datalogger module**

Package - Thermohygrometer 3-point Temperature and point Relative Humidity calibration

**\$322**

**Models :**

- Vaisala HM 34
- Vaisala HM 40

**IR Infrared digital thermometer (without contact) without datalogger module**

*All makes*

Thermometer 4-point calibration between 35 and 500°C

**\$215**

## Ventilation

### Anemometer

**Models: TSI 8384A and 9535**

15-point calibration

**\$430**

### Flow meters

*Calibration following the Simple acceptance decision rule based on ILAC G8 (2019). The acceptance limit is the same as the manufacturer's tolerance limit, so it does not take uncertainty into consideration.*

5-pt calibration for low flow- flow meters

**\$350**

5-pt calibration for high flow- flow meters

**\$350**

5-pt calibration for very high flow - flow meters
